

RESIDENTIAL INVESTMENT ADVISORY REPORT

Golf Acres vs. Greenspoint — Emaar South, Dubai South

A Comparative End-User Investment Analysis

Prepared for: Dubai Real Estate Brokerage — CEO Briefing

Client Profile: Residential End-User | Budget: AED 2,000,000 | Location: Emaar South, Dubai

Report Date: 26 June 2026

Prepared in the format and standard of a CEO-level institutional advisory (JLL / Knight Frank / CBRE style)

METHODOLOGY & SOURCING STATEMENT

This report was compiled using publicly available data from official and verifiable sources, including: Emaar Properties (developer brochures and official project pages), the Dubai Land Department (DLD) Open Data transaction registry, Property Finder, Bayut, Propsearch.ae (which republishes DLD transaction records), the Dubai Aviation Engineering Projects (DAEP) authority, Expo City Dubai economic impact studies (EY, 2023), the UAE Central Bank (CBUAE) Quarterly Economic Reviews, and corporate financial disclosures filed by Emaar Properties PJSC and Emaar Development PJSC on the Dubai Financial Market (DFM).

Every factual claim in this report is annotated with its source. Where project-level or community-level data could not be independently verified at the time of writing, the report explicitly states “Not Publicly Available” rather than estimating or inferring a figure. Forward-looking statements (e.g. appreciation forecasts, future infrastructure dates) are clearly identified as projections made by named third-party research providers, not as guaranteed outcomes. This report does not constitute financial, legal, or investment advice; Anthropic's Claude, which assembled this report, is not a licensed financial advisor or real estate broker. All figures are in AED unless otherwise stated, accurate as of the publicly available data at the time of research (June 2026), and subject to change.

Executive Summary

This advisory compares two Emaar-developed off-plan residential projects inside the Emaar South master-community of Dubai South — Golf Acres and Greenspoint — against a client mandate of a residential end-user with an AED 2,000,000 budget.

1. Budget Fit Is the Dominant Finding

Golf Acres launches with 1-bedroom apartments from AED 950,000 and 2-bedroom apartments from AED 1,750,888 — both comfortably within the AED 2,000,000 budget, leaving headroom for fees and furnishing.

Greenspoint is a townhouse-only product (3-bedroom and 4-bedroom units) starting at approximately AED 3,360,000–3,530,000 — 68% to 77% above the stated AED 2,000,000 budget. No Greenspoint unit type fits the client's budget at launch pricing.

2. Therefore, on Pure Affordability, Golf Acres Is the Only Project That Fits the Mandate

Greenspoint cannot be recommended for this specific client without either (a) a budget increase of at least AED 1.3M–1.5M, or (b) financing that brings effective entry cost within range. Section 16 (Final Recommendation) addresses this directly.

3. Strategic Context Supports Both Projects Directionally

- Emaar South sits inside Dubai South, the planned home of Al Maktoum International Airport (Dubai World Central) — a \$35bn (AED 128bn) expansion approved in 2024, targeting 150 million passengers by 2032 and an ultimate capacity of 260 million passengers and 12 million tonnes of cargo annually.
- Expo City Dubai, immediately adjacent, has been designated the UAE's first Green Innovation District and is hosting GITEX Global from 2026, reinforcing the corridor's long-term employment and commercial relevance.
- Emaar Properties, the developer of both projects, delivered record FY2025 results — Group revenue of AED 49.6bn (+40% YoY) and net profit before tax of AED 25.7bn (+36% YoY) — providing strong assurance of delivery capability.

4. Recommendation Preview

Golf Acres is the recommended project for this specific client, on the basis of budget compatibility, established DLD transaction history (50 recorded sale transactions, average price ~AED 1,300–1,800/sq.ft), and proximity (1.0 km) to the Emaar South Golf Club and a operating GEMS school. The full reasoning, investment scoring, and risk-adjusted analysis are presented in Part 16.

Source: Emaar Properties (properties.emaar.com); Propsearch.ae DLD transaction registry; Property Finder; Dubai Aviation Engineering Projects (daep.gov.ae); Expo City Dubai/EY Economic Impact Study (2023); Emaar Properties PJSC FY2025 results (12 Feb 2026).

Part 1 — Emaar South Area Intelligence

1.1 Community Overview

Emaar South is a master-planned residential district within Dubai South, developed by Emaar Properties. It is one of Emaar's large-scale freehold communities and sits among the largest residential components of the wider Dubai South masterplan.

Reported figures for the masterplan's scale vary slightly by source and reporting date (a normal feature of a multi-phase, multi-decade development), but converge on the following order of magnitude:

Metric	Reported Figure	Source
Total planned residential units	~15,000 (original masterplan) to 22,700–22,850 (current marketing materials)	Propsearch.ae; Chestertons MENA; JZMK Partners
Land area	700 hectares / 1,725 acres (masterplan); 6.7–7 sq. km also cited in agent materials	Propsearch.ae; Driven Properties; Tohid Fetrat guide
Golf course	18-hole championship course (~200 acres per one source)	Emaar Properties; JZMK Partners
Sub-communities	24 sub-communities listed by Propsearch; agent materials cite 10+	Propsearch.ae; Tohid Fetrat guide

Note on data variance: discrepancies between the 15,000-unit original masterplan figure and the ~22,700-unit current figure most likely reflect plan revisions and additional phases approved since the project's initial launch (common in Dubai masterplans). This report flags the variance rather than reconciling it without an official, dated masterplan document, which was Not Publicly Available at the time of writing.

Source: Propsearch.ae Emaar South community guide; Chestertons MENA Emaar South Area Guide (2025); JZMK Partners; Driven Properties.

1.2 History & Masterplan Positioning

Emaar South was launched by Emaar Properties as a golf-centric residential community inside Dubai South (formerly branded Dubai World Central), the government-backed urban development built around Al Maktoum International Airport. The masterplan is structured around a central 18-hole championship golf course, with residential clusters (apartments, townhouses, and villas) arranged around it in low- to mid-density zones connected by tree-lined boulevards.

The community has been delivered in successive phases. Established, already-delivered sub-communities cited across sources include Urbana, Golf Links, Golf Views, Greenview, and Fairway Villas. Active or recently launched phases include Golf Acres, Greenspoint (1 & 2), Greenway (1 & 2), Greenville (1 & 2), and Golf Edge.

Source: Emaar South community overview (dubaisouthprojects.ae); Chestertons MENA; Propsearch.ae sub-community listings.

1.3 Position Within Dubai South

Emaar South is one of several residential districts inside the 145 sq. km Dubai South masterplan, which also includes the Dubai World Central / Al Maktoum International Airport complex, Dubai South Logistics District, Dubai South Residential District, and the Expo City Dubai legacy site. Emaar South sits between Emirates Road (E611) and Sheikh Mohammed Bin Zayed Road (E311), giving direct highway access to Jebel Ali, Dubai Investments Park, and onward to central Dubai.

At full build-out, the broader Dubai South destination is projected by developer/agent marketing sources to generate 450,000 jobs and house approximately 1,000,000 residents — figures that originate from Dubai South promotional and master developer materials rather than an independently audited demographic census, and should be treated as long-term planning targets rather than current population.

Source: Chestertons MENA; investindxb.com (Dubai South JV/GDP figures); metropolitan.realestate Emaar South guide. Population/job figures are developer-sourced planning targets, flagged accordingly.

1.4 Population Profile

A verified, independently audited current population figure specific to Emaar South was Not Publicly Available at the time of writing. Dubai-wide, the emirate's population surpassed 4 million in 2025 (+5.4% YoY), with long-term projections targeting 5.8 million residents by 2040, according to Emirates NBD's economic outlook reported by Christie's International Real Estate Dubai. Emaar South-specific population data would need to be sourced from the Dubai Statistics Center directly, which was outside the scope of publicly retrievable web sources for this report.

Source: Christie's International Real Estate Dubai, citing Emirates NBD economic outlook (2026).

1.5 Future Expansion Plans & Infrastructure Developments

- **Al Maktoum International Airport (AMIA) expansion:** A AED 128 billion (~US\$35 billion) project approved by Sheikh Mohammed bin Rashid Al Maktoum in April 2024. The West Terminal alone is a seven-level, 800,000 sq m structure designed for 45 million passengers annually. Phase 1 targets 2032 for first operations at 150 million passengers/year; ultimate capacity is 260 million passengers and 12 million tonnes of cargo annually.
- **Construction status (as of June 2026):** More than 17,000 concrete piles completed, over 45 million cubic metres of excavation carried out, and the airport's second runway finished. Contracts worth over AED 13 billion are under execution, with a further AED 55+ billion in strategic contracts expected to be awarded in 2026.
- **Emirates relocation:** Emirates has confirmed it will move all operations to Al Maktoum International “in one go” rather than in stages, with the switchover targeted for 2032. Emirates broke ground in May 2026 on a \$5.1 billion engineering and maintenance complex at Dubai South (Phase 1 due 2029).
- **Transport connectivity:** The RTA has begun design work on a Route 2020 Metro extension linking the Expo 2020 station to the Al Maktoum West Terminal (~3 km, two new stations). A separate Airport Express Line linking DXB and Al Maktoum is under study. Etihad Rail's first passenger stations (Abu Dhabi, Dubai, Sharjah, Fujairah) are planned to integrate with metro and bus networks.
- **DXB transition:** Dubai Airports CEO Paul Griffiths and Sheikh Mohammed bin Rashid Al Maktoum have both indicated Dubai does not intend to operate two large hub airports once Al Maktoum reaches sufficient capacity; some reporting cites a possible DXB

closure as late as 2035, though no binding closure date has been officially confirmed in the sources reviewed.

Source: Wikipedia (Al Maktoum International Airport, cross-checked); Gulf News (16 June 2026); Arabian Business (16 June 2026 and Sheikh Hamdan update); Dubai Aviation Engineering Projects official site (daep.gov.ae); ftnews.com (May 2026); Place Overseas blog (Feb 2026) — used only for directional/forecast commentary, clearly flagged as such.

1.6 Airport Influence

Golf Acres is reported at approximately 7 minutes' drive from Al Maktoum International Airport (per Propsearch.ae's Google Maps-based drive-time calculation), with Dubai International Airport (DXB) approximately 49 minutes away. The wider Emaar South community is cited at roughly 12 minutes from Al Maktoum International and 44 minutes from DXB. K Estates (industry blog) reports Dubai South-area rents rose approximately 20% in the 12 months to early 2026 amid relocation of Emirates and Al Maktoum-linked staff — a figure from a single brokerage source and not independently corroborated by DLD rental index data in this research session, flagged accordingly.

Source: Propsearch.ae drive-time data (Google Maps-based); K Estates blog (Feb 2026) — single-source rental claim, flagged as unverified by a second source.

1.7 Expo City Dubai Influence

Expo City Dubai is the post-Expo 2020 legacy development on the former World Expo site, adjacent to Dubai South. Per the definitive Ernst & Young economic assessment (March 2023):

- Total GVA contribution to the UAE economy 2013–2042: approximately AED 154.9 billion (~US\$42.2 billion).
- Legacy phase (2022–2042) is projected to deliver ~62% of total GVA — i.e., the lasting value exceeds the event itself.
- Over 1 million full-time-equivalent job-years are projected 2013–2042 (~35,000 FTE jobs/year).
- District 2020 (Expo City's free zone) hosts 2,100+ companies with 100% foreign ownership and direct metro access.
- GITEX Global (the region's largest technology exhibition) is relocating to Expo City Dubai in 2026, and the Dubai Exhibition Centre is expanding from 45,000 sq m to 122,000 sq m in 2026 (target 150,000 sq m by 2027), positioning the site to host Gulfood and Arab Health from 2026 onward.

Source: Ernst & Young Economic Impact Study of Expo 2020 Dubai (March 2023), as cited by businesssetuphq.com (2026 update).

1.8 Economic Drivers & Employment Hubs

- Aviation & logistics: Al Maktoum International Airport, Dubai South Logistics District, and the adjacent Jebel Ali Port form a “sea-to-air” corridor; one industry source claims warehousing along this corridor is approximately 98% occupied (single-source claim, not independently corroborated).
- Innovation & exhibitions: District 2020 / Expo City Dubai (technology, sustainability, exhibitions).

- Construction & real estate: Sustained Emaar South project launches (Golf Acres, Greenspoint, Greenway, Greenville, Golf Edge) directly support local construction employment.

Source: Place Overseas blog (Feb 2026) for warehousing-occupancy claim, flagged as single-source; businesssetuphq.com for District 2020 figures (sourced to EY 2023 study).

1.9 Schools, Universities, Hospitals & Retail

Category	Verified Nearby Examples	Distance / Notes
Schools	GEMS Founders School – Dubai South	1.0 km from Golf Acres (Propsearch.ae); British curriculum; ~AED 37,000/yr
Schools	Greenfield International School	~12.6 km; British & IB curricula; ~AED 59,000/yr
Schools	The International School of Choueifat – DIP	~14.0 km; SABIS curriculum; ~AED 36,000/yr
Schools	Dove Green Private School	~14.7 km; British curriculum; ~AED 49,500/yr
Universities	Not Publicly Available — no major university campus confirmed inside Emaar South itself	—
Hospitals/Clinics	Al Maktoum Airport Clinic	~8 minutes' drive (Property Finder community guide)
Hospitals	NMC Royal Hospital, Dubai Investments Park	Under 20 minutes' drive
Hotels (proxy for retail/F&B density)	Holiday Inn Dubai Al Maktoum Airport; Aloft Dubai South; Rove Expo 2020	0.8–10.7 km from Golf Acres

Source: Propsearch.ae (Golf Acres nearby-schools and nearby-hotels data, sourced from school operator listings and DLD-area data); Property Finder Emaar South community guide.

1.10 Parks, Lifestyle Amenities & Recreation

- 18-hole championship golf course and clubhouse (Emaar South Golf Club), ~1.0 km from Golf Acres.
- Community parks — Chestertons MENA's 2025 area guide and Emaar marketing reference “25 community parks” across Emaar South (developer/agent-sourced figure).
- Jubilee Park, Expo Water Feature, and Al Forsan Park are all 10.3–10.9 km away — i.e., associated with Expo City Dubai rather than internal to Emaar South.
- Walking/cycling trails, yoga decks, multi-purpose sports courts, padel courts, and retail plazas are standard amenities across Emaar South sub-projects (see Part 2 for project-specific detail).

Source: Propsearch.ae Golf Acres guide (nearby attractions/parks); Chestertons MENA area guide.

1.11 Community Positioning & Long-Term Outlook

Multiple independent agent and research sources (Chestertons MENA, VIBGYOR Real Estate, Driven Properties) consistently position Emaar South as:

- An Emaar-brand entry point at a meaningfully lower price-per-square-foot than Emaar's more established communities (Dubai Hills Estate, Arabian Ranches), while carrying the same developer quality and Emaar Community Management standards.
- A structurally-driven growth story tied to a specific, funded catalyst (the AED 128bn Al Maktoum Airport expansion) rather than to general city-wide sentiment — this is a meaningfully different risk/return profile than “hype”-driven communities.
- A 5–10 year investment horizon community: the airport's first operational phase is not due until 2032, meaning the principal demand catalyst for Emaar South has not yet fully materialised.

This is a forward-looking thesis repeated across multiple brokerage and research sources; it should be read as informed market commentary, not as a guarantee of future price performance.

Source: VIBGYOR Real Estate (“Emaar South Dubai: 2026 Guide”, May 2026); Chestertons MENA; Driven Properties (April 2026).

1.12 Distances & Travel Times Summary (from Golf Acres / Emaar South)

Destination	Distance / Time	Source
Al Maktoum International Airport (DWC)	~7 minutes' drive (Golf Acres); ~12 minutes (Emaar South community-wide figure)	Propsearch.ae
Dubai International Airport (DXB)	~49 minutes (Golf Acres); ~44 minutes (Emaar South community-wide figure)	Propsearch.ae
Dubai Mall / Downtown Dubai	~42 minutes (Golf Acres); ~44 minutes (Emaar South community-wide)	Propsearch.ae
Palm Jumeirah	~34 minutes (Golf Acres); ~37 minutes (Emaar South community-wide)	Propsearch.ae
Burj Al Arab	~39 minutes (Golf Acres); ~41 minutes (Emaar South community-wide)	Propsearch.ae
The Walk, JBR	~35 minutes (Golf Acres); ~38 minutes (Emaar South community-wide)	Propsearch.ae
Expo City Dubai	~10.6 km / commonly cited as ~10 minutes by agent sources	Propsearch.ae; multiple agent listings
Dubai Marina	~20 minutes (Greenspoint marketing material)	Emaar/agent marketing (dubaihomesonline.com)

Note: all drive times are estimates calculated via Google Maps under typical traffic conditions, as disclosed by Propsearch.ae, and will vary with time of day and traffic.

Source: Propsearch.ae transport & access data (Golf Acres and Emaar South community guides).

Part 2 — Project Research

2.1 Golf Acres at Emaar South

Attribute	Detail
Developer	Emaar Properties (via subsidiary Emaar Dubai South DWC LLC)
Launch year / period	Sales launch late 2024 (“First Trace” recorded November 2024 per Propsearch.ae); construction began Q1 2026
Property type	Mid-rise apartment building (13 storeys per Propsearch.ae; one agent source cites 16 storeys — flagged as a minor source discrepancy) plus 10 exclusive townhouses
Unit mix	1, 2 and 3-bedroom apartments; 3-bedroom townhouses. Estimated 158 total units (Propsearch.ae)
Apartment sizes	1-bed: 738–827 sq.ft 2-bed: 1,220–1,731 sq.ft 3-bed: 1,804–2,255 sq.ft 3-bed townhouse: 2,563–2,564 sq.ft
Starting price	AED 950,000 (1-bed); some listings show AED 950,888 / AED 973,888 as the precise launch figure
Price ranges (at launch)	1-bed AED 950,888–1,109,888 2-bed AED 1,750,888 3-bed AED 2,490,888–4,368,888 Townhouse from AED 4,040,888
Average price per sq.ft (DLD, transacted)	~AED 1,100–1,800/sq.ft observed across 50 recorded DLD transactions (see Part 4 below); individual unit PSF varies materially by floor and view
Payment plan	10% on booking / 70% during construction / 20% on handover (“80/20” structure split as 10-70-20)
Down payment	10% at booking
Construction schedule	Foundation works underway as of construction start Q1 2026; foundation contractor: Alpha Pile Foundation Equipment Services; architect: Archcorp Architectural Engineering
Expected handover	December 2028
Amenities	Swimming pool, lush gardens, BBQ areas, kids' play area, outdoor gym, jogging track, yoga deck, sunken seating, landscaped gardens, multi-purpose courts, padel court, football field

Attribute	Detail
Masterplan positioning	Located in the heart of Emaar South near Dubai–Al Ain Road, with golf-course-facing units; ~1.0 km from Emaar South Golf Club
Construction progress (as of research date)	Early-stage: foundation/piling works (Q1 2026 construction start); a construction-progress photo dated April 2026 is referenced by Propsearch.ae
Project value (DLD-submitted estimate)	AED 145,200,000 (~US\$39.5 million) — developer-submitted estimate prior to construction; final cost may differ

Official brochure highlights: Emaar's official project description emphasises a “curated lifestyle, where contemporary architecture and lush greenery come together,” golf-inspired living with access to the championship course and clubhouse, and an aesthetic of “earthy tones and natural materials.”

Unique selling propositions: (1) lowest entry price point of any current Emaar South apartment launch reviewed in this research (AED 950,000); (2) golf-course-facing mid-rise design; (3) inclusion of a small number of exclusive golf-course townhouses within the same launch; (4) flexible 10/70/20 payment structure with only a 10% upfront commitment.

Golf Acres — Source Links

Official Emaar source: <https://properties.emaar.com/en/properties/golf-acres-at-emaar-south/>

Property Finder source: <https://www.propertyfinder.ae/en/new-projects/emaar-properties/golf-acres>

Independent verification / DLD transaction data: <https://propsearch.ae/dubai/golf-acres>

Note: a direct Bayut project-specific listing page for Golf Acres was not retrieved during this research session; Bayut's broader Emaar South community data (Section 3 and Part 4) was used instead, and is clearly labelled as community-level rather than project-specific where applied.

Source: Emaar Properties official site; Property Finder; Propsearch.ae (DLD-sourced data); JnA House and Provident Estate (unit size/price corroboration).

2.2 Greenspoint at Emaar South

Critical flag: Greenspoint is a townhouse-only product. There is no apartment or studio option. The minimum entry price recorded across multiple independent sources (Property Finder, Everhomes, OPR.ae, Asyan Properties) is materially above the client's AED 2,000,000 budget.

Attribute	Detail
Developer	Emaar Properties
Launch year / period	Launched 2025 (described by OPR.ae as “Emaar South's final Townhouse Cluster launch for 2025”); Greenspoint Phase 2 also launched 2025
Property type	Townhouses only, delivered in a four-plex (“fourplex”) gated format — four residences per building, generally with individual entrances and parking
Unit mix	3-bedroom and 4-bedroom townhouses only. Greenspoint: 196 units. Greenspoint 2: estimated 244 units (Propsearch.ae)
Unit sizes	3-bed: ~2,434 sq.ft BUA on ~1,882 sq.ft plot 4-bed (semi-detached): ~2,737 sq.ft BUA on ~3,236 sq.ft plot. One source cites 3-bed at 2,418 sq.ft and 4-bed at 2,767 sq.ft — minor variance across listings
Starting price	AED 3,360,000 (USD ~914,000) as of Q1 2025 per OPR.ae; Property Finder cites AED 3,532,888; Greenspoint 2 starts at AED 3,530,000 (Property Finder) / AED 3,530,000 (Propsearch.ae, sales launch figure)
Price ranges	3-bed townhouse: AED 3,530,000–3,800,000 4-bed townhouse: AED 4,050,000–4,110,000 (Everhomes, data as of March 2025)
Average price per sq.ft	Approx. AED 1,400–1,560/sq.ft implied by the price and size ranges above (calculated by this report from the disclosed price and size ranges; not independently published as a standalone PSF figure by Emaar)
Payment plan	80/20 structure: 10% down payment, 70% during construction, 20% on handover (consistent across Everhomes, eplogoffplan.com, and Property Finder)
Down payment	10% at booking
Construction schedule / contractor detail	Not Publicly Available at project-specific level in sources reviewed
Expected handover	Greenspoint: Q1 2029 (March 2029, per multiple sources). Greenspoint 2 / Phase 2: March 31,

Attribute	Detail
	2029 (Property Finder) — though one listing (PropertyPistol) cites January 2029 for a 3-bed configuration, a minor discrepancy flagged here
Amenities	Private pool access, 18-hole golf course, community centre, driving range, adults' and kids' swimming pools, kids' play area, multi-purpose room, fully equipped gym, jogging and cycling trails (950m jogging track / 4,200m cycling track per Asyan Properties), themed gardens, sports courts, football field, mosque, nursery proximity, K-12 school proximity
Masterplan positioning	Centrally located within Emaar South; ~5 minutes from Al Maktoum International Airport, ~10 minutes from Expo City Dubai, ~20 minutes from Dubai Marina (per OPR.ae and dubaihomesonline.com); closest school (GEMS Founders School – Dubai South) is 2.6–2.8 km away per Propsearch.ae (further than Golf Acres' 1.0 km)
Construction progress	Not Publicly Available — no construction-progress photography or signboard data was found in this research session (contrast with Golf Acres, where an April 2026 construction photo was located)
Project value (DLD-submitted estimate, Greenspoint 2 only)	AED 285,236,000 (~US\$77.7 million) — developer-submitted estimate prior to construction

Official brochure highlights: Emaar's official Greenspoint page emphasises “dynamic sports courts and adventure playgrounds,” “outdoor fitness zones and family-friendly trails,” golf-course access, and a “contemporary façade dressed in an earthy palette.” Marketing language explicitly targets families seeking space rather than entry-level buyers.

Unique selling propositions: (1) largest private living space of any Emaar South launch reviewed (up to ~2,737 sq.ft BUA); (2) private pool access cited in some marketing materials; (3) fourplex format offering townhouse-style privacy with shared-building economics; (4) positioned as Emaar South's most recent (2025) family-cluster launch.

Greenspoint — Source Links

Official Emaar source: <https://www.emaar.com/en/properties/greenspoint-at-emaar-south>

Official Emaar brochure (PDF): https://properties.emaar.com/wp-content/uploads/2025/02/GREENSPPOINT_ES_BROCHURE.pdf

Property Finder source: <https://www.propertyfinder.ae/en/new-projects/emaar-properties/greenspoint>

Independent verification / community data: <https://propsearch.ae/dubai/greenspoint>

Note: a direct, project-specific Bayut listing page for Greenspoint was not retrieved during this research session; as with Golf Acres, Bayut's Emaar South community-level data (Part 4) is used instead and clearly labelled.

Source: Emaar Properties official site and brochure; Property Finder; Propsearch.ae; OPR.ae; Everhomes.ae; Asyan Properties; eplogoffplan.com; dubaihomesonline.com.

2.3 Side-by-Side Snapshot

Metric	Golf Acres	Greenspoint
Entry price	AED 950,000	AED 3,360,000–3,532,888
Fits AED 2,000,000 budget?	Yes — 1BR and 2BR both fit	No — exceeds budget by ~68–77%
Unit types	1, 2, 3-bed apartments + 3-bed townhouses	3 & 4-bed townhouses only
Entry-level size	738 sq.ft (1-bed)	2,418–2,434 sq.ft (3-bed, smallest option)
Handover	December 2028	March 2029 (Greenspoint 2)
Distance to nearest school	1.0 km	2.6–2.8 km
Distance to golf course	~1.0 km	Direct golf-course access marketed; exact metres Not Publicly Available
DLD transaction history found	50 recorded sale transactions (Propsearch.ae)	Not located in this research session at project level

Source: Compiled by this report from all sources cited in Sections 2.1 and 2.2 above.

Part 3 — Market Pricing

3.1 Current Launch & Asking Prices

Project	Launch Price (from)	Current Asking Price (Bayut/PF listings)
Golf Acres	AED 950,000 (1-bed)	Community-level Emaar South asking avg. ~AED 2,444,839–3,590,000 (all unit types blended, per Bayut/Property Finder live listings, not Golf Acres-specific)
Greenspoint	AED 3,360,000–3,532,888 (3-bed)	Listings largely mirror launch pricing given recent 2025 launch; resale activity not yet established

Caveat: project-specific current asking prices (as opposed to community-wide blended averages) were not independently retrievable for either project as standalone listings beyond the original launch price points and the DLD resale transactions shown in Part 4. Community-level Emaar South figures are shown for directional context only and are explicitly labelled as such.

Source: Bayut Emaar South apartment listings; Property Finder Emaar South listings; Property Finder Golf Acres/Greenspoint project pages.

3.2 Current Resale Prices

Golf Acres: Resale/secondary transactions are visible directly in the DLD-sourced data presented in Part 4 (50 recorded sale transactions ranging from approximately AED 955,888 to AED 4,368,888 depending on unit size and type, recorded between November 2024 and June 2025).

Greenspoint: A project-specific DLD resale transaction history was Not Publicly Available in this research session. Given the project's 2025 launch and 2029 handover, secondary market activity would be expected to be minimal to date.

Source: Propsearch.ae Golf Acres DLD transaction registry.

3.3 Average Price per Square Foot — Community & Comparable Benchmarks

Community / Segment	Average Price PSF	Source
Emaar South — apartments (DLD-based)	Average sale price AED 1,570,550 across 1,650 apartment sales (last 12 months); average PSF not separately disclosed by this source but implied at roughly AED 1,400–1,600/sq.ft given typical unit sizes	Bayut (DLD-sourced data)

Community / Segment	Average Price PSF	Source
Emaar South — all property types blended	AED 1,605/sq.ft (2026 YTD, VIBGYOR Real Estate)	VIBGYOR Real Estate (May 2026)
Emaar South — apartments (Property Finder live listings)	Average price AED 2,450,000 (asking, not transacted); sizes avg. 1,400 sq.ft, implying ~AED 1,750/sq.ft asking	Property Finder
Golf Acres (DLD transacted, derived)	AED 1,100–1,800/sq.ft across 50 transactions (see Part 4 table)	Propsearch.ae / DLD
Dubai citywide average (all types, June 2026 YTD)	AED 1,916–1,976/sq.ft, +18% YoY (Jan 2026 vs Jan 2025)	Engel & Völkers; Oplus International Realty; Takween AlDar (all DLD-sourced)
Dubai South community-wide (DXB Analytics, Jan–Feb 2026)	AED 17,097/sq.ft cited by DXB Analytics — this figure is anomalously high relative to every other Dubai South source reviewed and is almost certainly a data or unit error in the source (e.g. AED/sq.m mismatched with AED/sq.ft, or a land-plot rather than built-unit calculation). This report explicitly disclaims this figure and does NOT rely on it elsewhere in this analysis.	DXB Analytics — flagged as likely erroneous, not used

Source: Bayut; VIBGYOR Real Estate; Property Finder; Propsearch.ae/DLD; Engel & Völkers (June 2026); Oplus International Realty (Q1 2026 DLD benchmark); Takween AlDar (May 2026).

3.4 Comparable Projects

Within Emaar South itself, the closest comparable apartment launches to Golf Acres are Golf Views, Golf Point, and Vista Ridge (established apartment clusters), with VIBGYOR Real Estate reporting an average apartment transaction size of just over 1,000 sq.ft and an average sale price of AED 1,717,815 across these sub-communities in 2026 YTD transactions.

The closest comparable townhouse cluster to Greenspoint is Urbana and Greenway, with VIBGYOR reporting an average townhouse size of 2,231 sq.ft and an average sale price of AED 2,806,797 — notably below Greenspoint's AED 3,360,000+ entry price, suggesting Greenspoint is positioned at a premium to other Emaar South townhouse products, consistent with its 2025 (more recent) launch date.

Source: VIBGYOR Real Estate, “Emaar South Dubai: 2026 Guide” (May 2026), citing 2026 YTD transaction data.

3.5 Historical Pricing & Current Market Positioning

Earlier Emaar South launches (circa Q1 2023) priced 1-bedroom apartments from as low as AED 580,000, per one historical agent source (metropolitan.realestate). This implies that Golf Acres' AED 950,000 starting price represents meaningful nominal appreciation in launch pricing across approximately three years of new Emaar South phases — though this compares

different specific sub-projects launched at different times, not the same unit resold, so it is a market-positioning indicator rather than a like-for-like appreciation figure.

Current positioning: Emaar South / Golf Acres sits at the affordable end of Emaar's own portfolio (well below Dubai Hills Estate, Dubai Creek Harbour, and Downtown Dubai pricing — see Part 14 for full benchmarking), consistent with its more peripheral location and earlier stage of community maturity relative to those established Emaar masterplans.

Source: metropolitan.realestate Emaar South historical pricing (cited as of Q1 2023); VIBGYOR Real Estate; Chestertons MENA.

Part 4 — Dubai Land Department (DLD) Data

4.1 Project-Level DLD Transaction Data — Golf Acres

Propsearch.ae republishes DLD Open Data transaction records under the Dubai government's Open Data directive. As of the most recent update referenced (9 April 2026), 50 sale transaction records exist for Golf Acres. A representative sample (most recent transactions retrieved) is shown below:

Date	Unit Type	Size (sq.ft)	Price (AED)	Price/sq.ft (AED)
30 Jun 2025	3-bed flat	2,255	2,485,888	1,102
05 May 2025	1-bed flat	812	1,087,888	1,339
28 Apr 2025	1-bed flat	812	1,085,888	1,337
10 Apr 2025	1-bed flat	738	973,888	1,319
02 Apr 2025	1-bed flat	827	1,100,888	1,331
18 Mar 2025	3-bed flat	1,812	2,799,888	1,545
06 Mar 2025	3-bed flat	1,812	3,220,888	1,777
06 Mar 2025	1-bed flat	738	955,888	1,295
05 Mar 2025	1-bed flat	827	1,109,888	1,342
05 Mar 2025	3-bed flat	2,564	4,368,888	1,704

Observed pattern: PSF on 1-bedroom units ranges narrowly (AED 1,295–1,339/sq.ft), while 3-bedroom units show wider PSF variance (AED 1,102–1,777/sq.ft), likely reflecting floor level, golf-course view premiums, and unit-specific positioning within the building. All transactions are classified by DLD as “Pre-registration Sale” (Oqood/off-plan), Project: Golf Acres, Master Project: Dubai World Central, Area: Madinat Al Matar.

Source: Propsearch.ae, republishing Dubai Land Department Open Data (dubailand.gov.ae/en/open-data/real-estate-data/), updated 9 April 2026.

4.2 Project-Level DLD Transaction Data — Greenspoint

A project-specific DLD transaction table for Greenspoint, analogous to the Golf Acres table above, was Not Publicly Available within this research session. The project's recent (2025) launch and 2029 handover date mean off-plan pre-registration transactions would be the only transaction type possible to date; these were not located on the public pages reviewed. This should not be read as an absence of transactions — only as a gap in what was retrievable through public search and the specific aggregator pages accessed.

4.3 Community-Level Insights (Emaar South)

Metric	Figure	Source
Apartment sales (last 12 months)	1,650 transactions, average price AED 1,570,550	Bayut (DLD-sourced)

Metric	Figure	Source
Average asking price change (6 months)	+21% (asking); +12% (DLD transacted)	Bayut
Dubai South community PSF growth (YoY)	+19.33% to +22.8% YoY cited across two independent sources	Property Finder; Real Estate Club Dubai statistics page
Dubai South community-wide investor activity (5 months, 2025)	AED 15 billion in transactions in first five months of 2025, approaching full-year 2024's AED 16.1 billion	K Estates blog, citing market reporting — single-source, flagged as such

Source: Bayut; Property Finder; Real Estate Club Dubai; K Estates (single-source figure flagged).

4.4 Historical Appreciation, Market Trends & Recent Activity (Dubai-wide context)

- 2025 full-year: Dubai recorded approximately 270,000 total real estate transactions worth AED 917 billion (+20% YoY); residential-only sales reached 215,060 transactions worth AED 682.6 billion (Dubai Land Department / CBRE UAE Q4 2025 Review).
- Q1 2026: DLD reported total real estate transactions of AED 252 billion, +31% YoY in value and +6% in volume, with 60,303 transactions and 718,160 total real estate procedures (DLD official press release, dated within Q1 2026 reporting window).
- Q1 2026 residential-specific: Reidin/DLD-sourced data cited 45,221 residential transactions worth AED 137.31 billion (+19.0% YoY value, -17.1% QoQ volume from the Q4 2025 peak).
- January 2026 set an all-time monthly record at AED 72.4 billion in transaction value, per D&B Properties' market report.
- Citywide average price per sq.ft reached AED 1,976/sq.ft in January 2026 (+18% YoY from AED 1,674/sq.ft in January 2025), per DLD data via Dubai Pulse Open Data, cross-referenced by Oplus International Realty and Takween AlDar.
- Supply pipeline: approximately 120,000 new residential units are scheduled for handover across Dubai in 2026, with a further ~146,400 units in 2027 and ~120,100 in 2028 (ValuStrat/Global Property Guide analysis) — a meaningful supply wave that several sources (including Fitch, cited by drivenproperties.com) flag as a moderating factor on near-term price growth, with a bearish-scenario downside estimate of up to ~15% cited by Fitch in that secondary source.

Source: Dubai Land Department official press release (dubailand.gov.ae, Q1 2026 surge release); CBRE UAE Q4 2025 Review; Reliant Surveyors Q1 2026 report; D&B Properties; Oplus International Realty; Global Property Guide (May 2026); Driven Properties (Fitch citation, flagged as a third-party forecast, not a DLD figure).

Part 5 — Rental Market

5.1 Estimated Rental Yield

Segment	Estimated Gross Yield	Source
Emaar South apartments (overall)	~4.23%–5.2% (two sources)	Bayut (4.23%); Property Finder community guide (5.2%)
Emaar South apartments — 1-bed	~5.11%	Property Finder Emaar South guide
Emaar South apartments — 2-bed	~5%	Property Finder Emaar South guide
Emaar South apartments — 3-bed	~4.7%	Property Finder Emaar South guide
Emaar South — 2 & 3-bed (separate source)	6.19% (2-bed) and 6.03% (3-bed)	Chestertons MENA (mid-2025 estimate) — notably higher than Property Finder figures above; flagged as a source discrepancy
Emaar South townhouses (avg.)	Implied via avg. annual rent AED 115,792 on avg. sale price AED 2,806,797 $\approx$ 4.1%	Calculated by this report from VIBGYOR Real Estate 2026 YTD data
Emaar South villas (avg.)	Implied via avg. annual rent AED 208,914 on avg. sale price AED 4,895,316 $\approx$ 4.3%	Calculated by this report from VIBGYOR Real Estate 2026 YTD data
Dubai citywide apartment yield (REIDIN, April 2026)	Up to 7.08%; market-wide residential average 6.57%	REIDIN, cited by Global Property Guide (May 2026)
Dubai citywide villa yield (REIDIN, April 2026)	4.54%	REIDIN, cited by Global Property Guide

Reconciliation note: yield estimates for Emaar South apartments range from approximately 4.2% to 6.2% depending on the source and methodology (asking-rent vs. DLD-transacted rent, and the specific sub-community sampled). This is a normal range of variance for community-level yield estimates and underscores why building-specific rent comparables should be obtained before a final purchase decision. No source in this research provided a Golf Acres-specific or Greenspoint-specific yield figure, since both are pre-handover off-plan projects with no rental history.

Source: Bayut; Property Finder Emaar South community guide; Chestertons MENA (2025); VIBGYOR Real Estate (2026); REIDIN via Global Property Guide (May 2026).

5.2 Rental Demand & Tenant Profile

- VIBGYOR Real Estate reports 3-bedroom townhouses as “the most active rental market” in Emaar South, with 442 lease contracts recorded in the first five months of 2026 — citing this as evidence of genuine family-tenant demand rather than only investor speculation.
- 1-bedroom apartments are described as “the most rented property type in Emaar South by a significant margin,” with approximately 500 rental contracts in the same five-month window.

- Tenant profile is consistently described across sources (Property Finder, VIBGYOR) as: aviation and logistics-sector professionals working at Al Maktoum International Airport / Dubai South, Expo City Dubai employees, and families relocating from more central, costlier Dubai districts seeking larger living space at a lower entry cost.

Source: VIBGYOR Real Estate (May 2026 2026-YTD rental contract data); Property Finder Emaar South community guide.

5.3 Occupancy

A standalone, audited occupancy rate (vacancy rate) specific to Emaar South was Not Publicly Available in the sources reviewed. The high rental-contract volumes cited above (500 one-bed contracts and 442 three-bed contracts in five months) are an indirect proxy for active demand, but do not equate to a published occupancy percentage.

5.4 Rental Price Trends (Dubai-wide context)

- Apartment rental rates reached AED 128.7/sq.ft/month in Q1 2026 (+1.9% QoQ, +5.0% YoY), per Reliant Surveyors' Q1 2026 market report (Reidin/DLD-sourced).
- Villa rental rates reached AED 106.3/sq.ft/month in Q1 2026 (+0.6% QoQ).
- Citywide annual rental growth (REIDIN) eased from 6.2% in December 2025 to 1.5% in April 2026, attributed by Cavendish Maxwell's Q1 2026 report to increased supply and the regulatory effect of the Smart Rental Index moderating renewal increases.
- Betterhomes' Q1 2026 report notes new-let apartment prices in prime communities declined 10–20% YoY even as renewals remain anchored by the rental index — creating a widening gap between sitting-tenant and new-tenant rents.

Source: Reliant Surveyors Q1 2026 report; REIDIN via Global Property Guide; Cavendish Maxwell Q1 2026 report; Betterhomes Q1 2026 report (all as cited in globalpropertyguide.com, May 2026 compilation).

5.5 Expected ROI & Historical Rental Growth

On the figures above, a Golf Acres 1-bedroom unit purchased at the AED 950,000 launch price, if it achieves the community-level ~5.1% yield cited by Property Finder, would generate approximately AED 48,450 in estimated annual gross rent — before service charges, maintenance, and any vacancy. This is an illustrative calculation by this report based on a community-level yield assumption, not a project-specific guarantee, and should be treated as indicative only.

Historical rental growth specific to Emaar South over a multi-year period (e.g., a 3- or 5-year CAGR) was Not Publicly Available as a single clean published figure; the closest available proxy is the Dubai-wide REIDIN annual rental growth trend cited in Section 5.4 above, which is a citywide rather than community-specific figure.

Source: Property Finder Emaar South yield data; Reliant Surveyors; REIDIN/Global Property Guide. Calculation performed by this report; not an official projection from any cited source.

Part 6 — Payment Plan Comparison

Element	Golf Acres	Greenspoint
Down payment	10% on booking	10% on booking
Construction-linked payments	70% during construction	70% during construction
Handover payment	20% on handover	20% on handover
Post-handover payment	None disclosed in sources reviewed (structure appears to be a standard 10/70/20 with no post-handover tranche)	None disclosed in sources reviewed
Total structure	80/20 (10% booking + 70% construction = 80% pre-handover; 20% on handover)	80/20 (identical structure)
Buyer flexibility	Standard Emaar structure; no interest-free extended post-handover plan identified in sources for this specific launch	Identical structure; one Property Finder listing for Greenspoint (not Phase 2) also references an “80/20” plan with “more details upon contact,” suggesting some unit-specific flexibility may exist but is not publicly itemised

6.1 Cash Flow Implications

Both projects use an identical 10/70/20 structure, so the comparison below is driven entirely by absolute price, not by structural flexibility.

Stage	Golf Acres — 1-Bed (AED 950,000)	Greenspoint — 3-Bed Townhouse (AED 3,360,000)
Booking (10%)	AED 95,000	AED 336,000
Construction instalments (70%, total)	AED 665,000	AED 2,352,000
Handover (20%)	AED 190,000	AED 672,000
Total cash required by handover	AED 950,000	AED 3,360,000
Within stated AED 2,000,000 budget?	Yes — full amount fits with AED 1,050,000 of budget headroom remaining	No — exceeds budget by AED 1,360,000 (68% over) even before DLD fees, agency fees, and furnishing

6.2 Recommendation (Payment Plan Lens)

From a pure cash-flow planning perspective, Golf Acres is the only one of the two projects that can be funded entirely within the stated AED 2,000,000 budget without financing, leaving a contingency reserve of roughly AED 1,050,000 (more than the full

Golf Acres purchase price again) for the standard ~7–8% of property value in DLD transfer fees, agency commission, and mortgage registration costs cited elsewhere in this report (Part 11), plus furnishing and post-handover costs.

Greenspoint would require either (a) a 4% Dubai Land Department fee plus a 2% agency fee on top of an already-over-budget AED 3,360,000+ purchase price, pushing all-in cost to approximately AED 3,562,000+, or (b) mortgage financing to bridge the gap — which is feasible in principle (UAE banks fund up to 80% loan-to-value for residents per multiple sources in Part 11) but changes the client's profile from a cash end-user to a financed buyer, a material change to the original mandate that should be confirmed with the client before proceeding.

Source: Calculations performed by this report using payment-plan percentages and price points sourced in Part 2 (Propsearch.ae, Everhomes, OPR.ae, Property Finder, Chainex Real Estate for fee assumptions).

Part 7 — Developer Analysis: Emaar Properties

7.1 Corporate Profile & Financial Strength

Emaar Properties PJSC (DFM: EMAAR) is a Dubai Financial Market-listed developer founded in 1997 by Mohamed Alabbar. Both Golf Acres and Greenspoint are delivered through Emaar Development PJSC (DFM: EMAARDEV), Emaar's majority-owned, build-to-sell UAE development subsidiary.

Metric (FY2025, full year)	Emaar Properties PJSC (Group)	Emaar Development PJSC (UAE subsidiary)
Property sales	AED 80.4 billion (+16% YoY)	AED 71.1 billion (+9% YoY)
Revenue	AED 49.6 billion (+40% YoY)	AED 27.5 billion (+44% YoY)
Net profit before tax	AED 25.7 billion (+36% YoY)	AED 15.5 billion (+52% YoY)
EBITDA	AED 25.6 billion (+33% YoY)	Not separately disclosed at subsidiary level in source reviewed
Revenue backlog (future revenue visibility)	AED 155 billion (+39% YoY)	AED 134.3 billion (UAE developments, to be recognised over ~4 years)
Dividend (Emaar Development)	—	100% of share capital, AED 4 billion proposed (+47% YoY)

Mall portfolio occupancy: 98% average across Emaar's retail assets in FY2025, indicating strong recurring-revenue diversification beyond pure development sales — a relevant signal of overall corporate resilience, even though it does not directly relate to residential delivery risk.

Source: Emaar Properties PJSC official press release, 12 February 2026 ("Highest ever property sales reach AED 71.1 billion..."); Gulf News (12 Feb 2026); Construction Week Online (12 Feb 2026).

7.2 Delivery History & Completed Projects

- Emaar has delivered approximately 79,000 residential units since 2002, per Emaar Development's own Q3 2025 press release.
- A separate industry source (investindxb.com, citing year-end-2023 Emaar facts) cites 108,000 residential units delivered cumulatively and 25,500 units under development as of 31 December 2023 — a higher figure than the 79,000 cited above, likely reflecting different cut-off dates or Group-wide vs. UAE-only scope. Both figures are presented; the discrepancy is flagged rather than resolved, as no single authoritative reconciliation was found.
- Flagship completed master communities include: Downtown Dubai (Burj Khalifa, The Dubai Mall), Dubai Marina, Emirates Living, Arabian Ranches, Dubai Hills Estate, and The Springs.
- Over 47,200 residential units are reported under development for future delivery (Emaar Development Q3 2025 release).

Source: Emaar Development PJSC Q3 2025 press release (6 November 2025); investindxb.com (Emaar facts, cited as of 31 Dec 2023).

7.3 Construction Quality, Brand Reputation & Community Management

Multiple independent agent sources (Aigents Realty, May 2026) state that Emaar residential units command a 10–15% resale price premium over comparable non-Emaar properties, attributed to global brand equity, build quality, and the standards maintained by Emaar Community Management (ECM), Emaar's in-house community/facilities management arm. This is a market-commentary claim from a single secondary source and is presented as such, not as an audited statistic.

Source: Aigents Realty, “Emaar Properties Record Year Analysis 2025 Guide” (May 2026) — single-source claim, flagged.

7.4 Resale Performance

Section-specific Emaar South resale performance is evidenced directly by the Golf Acres DLD transaction data in Part 4, which shows transactions occurring well before project completion (“pre-registration sale” / Oqood resales), indicating an active secondary off-plan market even at this early construction stage — a positive liquidity signal for end-users who may wish to exit before handover.

7.5 Awards & Delivery Consistency

A specific, named industry award (e.g., a named “Best Developer” award with year and issuing body) for Emaar was Not Publicly Available as a verifiable, dated citation within this research session. Emaar's own communications (per its FY2025 results release) emphasise “continued confidence in Dubai's real estate market” and “a regulatory framework that supports long-term development,” but these are corporate statements, not third-party-verified awards, and are presented as such.

7.6 Why Buyers Trust Emaar (Synthesis)

- Scale and balance-sheet strength: AED 155 billion Group revenue backlog provides multi-year revenue visibility, reducing (though not eliminating) the risk of project abandonment due to developer insolvency.
- Track record: tens of thousands of delivered units across multiple economic cycles, including the 2008–2009 downturn that triggered Dubai's regulatory reforms (see Part 10).
- Regulatory standing: as a publicly listed, RERA-registered developer, Emaar is subject to the same escrow account and Oqood registration requirements as all Dubai developers (Part 10), but its scale and track record are frequently cited by brokers as reducing perceived execution risk relative to smaller or newer developers.

Source: Synthesis by this report from all sources cited in Part 7.

Part 8 — Target Buyer Analysis

8.1 Golf Acres — Ideal Buyer Profiles

Buyer Type	Why Golf Acres Fits
Families	1, 2 and 3-bedroom apartment options plus 3-bed townhouses accommodate a range of family sizes; proximity (1.0 km) to GEMS Founders School supports school-run logistics; community parks, kids' play areas, and a dedicated football field support family lifestyle needs.
Professionals (especially aviation/logistics sector)	~7-minute drive to Al Maktoum International Airport positions Golf Acres well for the airport's growing workforce — directly relevant given Emirates' planned full relocation to Al Maktoum and its new \$5.1bn engineering complex breaking ground in May 2026.
Airport employees	As above; Property Finder's Emaar South guide explicitly identifies “workers at Al Maktoum Airport or Dubai South” as a target tenant/buyer segment, citing a 12–20 minute commute.
Long-term residents	The 5–10 year investment/occupancy horizon implied by the airport's 2032 first-phase timeline suits buyers planning to hold rather than flip; Emaar's brand and community-management standards support long-term livability.
First-time buyers	AED 950,000 entry price (1-bed) is well below the Dubai citywide average property price and within reach of a wider segment of first-time buyers than most Emaar-branded products.
Lifestyle buyers (golf enthusiasts)	Direct positioning around the 18-hole championship golf course, clubhouse, and driving range; Emaar's own marketing explicitly frames the project as a “golf-inspired lifestyle.”

Source: Property Finder Emaar South community guide; Emaar Properties official marketing; VIBGYOR Real Estate buyer-profile commentary (May 2026).

8.2 Greenspoint — Ideal Buyer Profiles

Buyer Type	Why Greenspoint Fits
Premium buyers	Entry price of AED 3.36M+ positions Greenspoint above the Emaar South apartment segment, targeting buyers seeking more space and exclusivity within the same master community without paying central-Dubai prices.
Larger families	3- and 4-bedroom townhouses with up to ~2,737 sq.ft BUA and private plots (up to ~3,236 sq.ft)

Buyer Type	Why Greenspoint Fits
	suit families needing more bedrooms and private outdoor space than an apartment provides.
High-income professionals	The higher entry price implicitly filters for buyers with stronger purchasing power; OPR.ae explicitly markets the project to “families with children” and “golf enthusiasts who seek a fairway lifestyle” in a higher income bracket than Golf Acres' entry-level segment.

Important client-fit conclusion: None of the three Greenspoint buyer profiles above match the stated client mandate (residential end-user, AED 2,000,000 budget). Greenspoint's buyer profile assumes a budget at least 68% above the client's stated ceiling. This is the single most decision-relevant finding of Part 8.

Source: OPR.ae Greenspoint project guide; dubaihomesonline.com; Everhomes.ae.

Part 9 — Supply & Demand

9.1 Existing & Upcoming Supply

- Dubai-wide, approximately 120,000 residential units are scheduled for handover in 2026, with a further ~146,400 units in 2027 and ~120,100 units in 2028 (ValuStrat/Global Property Guide), representing a substantial multi-year supply wave.
- Within Emaar South specifically, Propsearch.ae's developer-page listing shows multiple concurrent active sub-projects under development or planned, including Greenspoint, Greenspoint 2, Greenview 1–3 (complete), Greenville, Greenville 2, Greenway, and Greenway 2 — indicating an active, multi-phase pipeline of new supply landing in the same broad timeframe as Golf Acres and Greenspoint.
- New launches: Chestertons MENA's 2025 area guide lists Golf Edge (handover Q1 2029) and Greenway (handover May 2028) as additional concurrent Emaar South launches competing for the same buyer pool.

Source: Global Property Guide (May 2026); Propsearch.ae Emaar Dubai South DWC developer page; Chestertons MENA (2025).

9.2 Population & Employment Growth

- Dubai's population surpassed 4 million in 2025 (+5.4% YoY), with Emirates NBD projecting 5.8 million residents by 2040 (Christie's International Real Estate Dubai, citing Emirates NBD).
- UAE non-oil GDP is projected by the UAE Central Bank (CBUAE) to grow approximately 5.3% in 2026, with overall UAE real GDP growth estimated at 5.6% in 2025 and projected to remain broadly similar in 2026 (CBUAE Quarterly Economic Review, March 2026).
- Expo City Dubai's District 2020 alone hosts 2,100+ companies, and the broader Expo legacy phase (2022–2042) is projected to generate the equivalent of ~35,000 full-time jobs per year (EY 2023 study).

Source: Christie's International Real Estate Dubai; CBUAE Quarterly Economic Review (March 2026); EY Economic Impact Study of Expo 2020 Dubai (2023), via businesssetuphq.com.

9.3 Airport Expansion & Expo Legacy as Demand Drivers

These two catalysts are covered in full in Part 1 (Sections 1.5 and 1.7) and are not repeated in full here. In summary: the AED 128 billion Al Maktoum Airport expansion (first-phase target 2032, ultimate capacity 260 million passengers/year) and the Expo City Dubai legacy (projected AED 154.9 billion cumulative GVA contribution 2013–2042) together represent the two largest, most concretely funded demand catalysts specific to the Emaar South / Dubai South corridor, as distinct from general Dubai-wide population growth.

9.4 Absorption Trends, Vacancy & Future Demand

Direct, audited absorption-rate or vacancy-rate data specific to Emaar South was Not Publicly Available in the sources reviewed. The closest available proxies are: (a) the high rental-contract volumes cited in Part 5 (500 one-bed and 442 three-bed contracts in five months of 2026), and (b) the active DLD resale activity for Golf Acres (50 transactions recorded pre-completion), both of which suggest healthy absorption without providing a formal vacancy percentage.

Forward demand outlook: Multiple sources (VIBGYOR Real Estate, K Estates) frame Emaar South as a 5–10 year structural growth story tied explicitly to the airport's phased build-out, rather than a community that is already at peak demand maturity. This implies upside is back-loaded toward 2028–2032 rather than immediate, a timing consideration directly relevant to the client's holding-period decision (see Part 13).

Source: VIBGYOR Real Estate (May 2026); K Estates (Feb 2026).

Part 10 — Regulatory Review

10.1 Dubai Land Department (DLD)

The DLD is the Dubai government authority responsible for registering and regulating all real estate transactions in the emirate, including sales, mortgages, leasehold/usufruct rights, and rental (Ejari) contracts. It maintains the Register of Real Estate Developers and publishes transaction data under its Open Data directive — the same dataset that underlies the Golf Acres transaction table in Part 4.

Source: Dubai Land Department official site (dubailand.gov.ae); BayutAPI documentation on DLD data structure.

10.2 RERA (Real Estate Regulatory Agency)

RERA was established in 2007 under Dubai Law No. 85 as the regulatory arm of the DLD. It licenses real estate brokers, registers developers, mandates escrow accounts for off-plan projects, maintains the RERA Rental Index (used to govern permissible rent increases), and adjudicates real estate disputes. No developer may legally market or sell off-plan units in Dubai without being registered with the DLD and RERA.

Source: AlixirNova Dubai Real Estate (RERA explainer, March 2026); Dubai Land Department.

10.3 Escrow Accounts (Law No. 8 of 2007)

Under Law No. 8 of 2007, every developer selling off-plan units in Dubai must open a project-specific escrow account with a DLD-approved bank before any unit can be sold. All buyer payments must be deposited directly into this account — never to a developer's general operating account or to a sales agent. Funds are released to the developer only after an independent, RERA-approved construction consultant verifies that specific physical construction milestones have been reached.

Retention limits on developer default/cancellation, per the law and subsequent guidance (Januss Developers' 2025 legal summary, cross-referenced against the official DLD legal text):

- If construction has not started: developer may retain up to 30% of amounts paid; must refund the excess within 60 days.
- Below 60% completion: developer may retain up to 25% of total unit value.
- Between 60% and 80% completion: retention increases to up to 40% of total unit value.
- Completed but not handed over: retention remains capped at 40% of total unit value.
- Post-handover: the escrow agent must retain 5% of the total escrow account value for one year after registration of units in buyers' names, per the official DLD legal text (dlp.dubai.gov.ae).

Both Golf Acres and Greenspoint, as Emaar off-plan launches, are required by law to operate under this escrow framework; this report did not locate the specific escrow account numbers for either project (these are typically disclosed directly to buyers in the Sales and Purchase Agreement and via the Dubai REST app, not in public marketing material).

Source: Dubai Land Department, Law No. (8) of 2007 Concerning Escrow Accounts (official legal text, dlp.dubai.gov.ae); Januss Developers (legal guide, Dec 2025); Global Law Experts; Knightsbridge (Nov 2025).

10.4 Oqood Registration & Title Deed

Off-plan purchase agreements must be registered through the Oqood system — the DLD's Interim Real Estate Register. Registration on Oqood is what makes a sale legally enforceable; sales made before required DLD approvals and project registration are considered null and void. Upon completion and handover, the Oqood interim registration converts into a full Title Deed, issued by the DLD, which is the final, permanent proof of ownership.

Source: Dubai Land Department investor guide, as summarised by dubaiproperty.news (March 2026) and Ellington Properties (legal explainer, undated/recent).

10.5 Off-Plan Regulations & Consumer Protection

- Developers must own the land outright (or hold a valid master-development agreement) and obtain RERA approval before marketing or selling any off-plan unit.
- RERA previously required developers to complete 20% of physical construction (or deposit an equivalent guarantee) before launching sales — a rule whose current precise application was described by one source as having “evolved”, without specifying the current exact threshold; this report flags that the precise current rule should be confirmed directly with RERA/DLD rather than relied upon from secondary commentary.
- If a project is officially cancelled by RERA, the escrow agent (bank) must refund depositors directly from the ring-fenced escrow account — funds are legally the depositors' property, not the developer's asset, even in a developer bankruptcy scenario.
- Buyers can verify any project's registration, escrow account, and completion percentage via the Dubai REST app or DLD's online portal before making any payment.

Source: Januss Developers (Dec 2025); MAK Developers (Dec 2025); Ellington Properties (legal explainer).

10.6 Why These Safeguards Reduce Investment Risk

For an off-plan purchase such as Golf Acres or Greenspoint, the escrow and Oqood framework directly mitigates the two largest historical risks in the Dubai off-plan market (both of which materialised during the pre-2008 unregulated period, per Global Law Experts' historical summary): (1) developer fund misappropriation/diversion to other projects, and (2) double-selling of the same unit to multiple buyers. Because Emaar is a large, RERA-registered, DFM-listed developer with an AED 155 billion revenue backlog (Part 7), the marginal protective value of escrow is somewhat lower than for a smaller, less-capitalised developer — but the legal protection itself applies identically regardless of developer size.

Source: Global Law Experts (Jan 2026); synthesis by this report.

Part 11 — UAE Macroeconomic Outlook

Indicator	Figure	Source
UAE population	Surpassed 4 million in Dubai alone in 2025 (+5.4% YoY); long-term Dubai projection of 5.8 million by 2040	Christie's International Real Estate Dubai, citing Emirates NBD
UAE real GDP growth — 2025	Estimated at 5.6% (CBUAE, March 2026 Quarterly Review); a separate estimate cites ~4.9–5.0% from other sources (World Bank / Standard Chartered, via Middle East Briefing)	CBUAE; Middle East Briefing — minor variance between sources flagged
UAE real GDP growth — 2026 (forecast)	Projected at approximately 5.2%–5.6% (CBUAE); a separate eToro-cited estimate gives 5.3%	CBUAE Quarterly Economic Review (March 2026); Gulf Business (Dec 2025)
Dubai-specific GDP growth — 2026 (forecast)	4.5% (Emirates NBD, via Christie's International Real Estate Dubai)	Christie's International Real Estate Dubai
Non-hydrocarbon sector growth — 2025	6.1% YoY (Q1–Q3 2025)	CBUAE Quarterly Economic Review (March 2026)
Foreign investment in Dubai real estate — Q1 2026	AED 148.35 billion (+26% YoY); 48,445 foreign investments (+11%)	Dubai Land Department official Q1 2026 press release
UAE inflation — 2025 actual / 2026 forecast	1.3% actual (2025 average, CBUAE); ~1.8% forecast for 2026 (eToro/Gulf Business); a separate Christie's figure cites 2.8% for 2025 and 2.5% forecast for 2026 — discrepancy likely reflects different inflation baskets/methodologies and is flagged rather than reconciled	CBUAE; Gulf Business; Christie's International Real Estate Dubai
UAE Central Bank Base Rate	3.65% (held since December 2025 cut, reaffirmed unchanged through April 2026, tracking the US Federal Reserve due to the AED–USD currency peg)	Trading Economics; CBUAE Quarterly Economic Review (March 2026)
Mortgage rate environment	Fixed mortgage offers around 3.99%–4.24% cited by one mortgage-broker source as available in the current environment	Chainex Real Estate (May 2026) — single-source rate quote, flagged
UAE banking sector	Total assets AED 5.34 trillion at end-2025 (+17.1% YoY); loan	CBUAE Quarterly Economic Review (March 2026)

Indicator	Figure	Source
	portfolio +17.9% YoY; deposits +16.2% YoY	

11.1 Government Spending & Infrastructure Investment

The single largest infrastructure commitment directly relevant to this report's subject communities is the AED 128 billion (~US\$35 billion) Al Maktoum International Airport expansion (Part 1, Section 1.5), alongside the Dubai Metro Blue Line (AED 18 billion, 30 km, 14 stations, approved November 2023) and the broader Dubai Economic Agenda D33 and Dubai Real Estate Strategy 2033 frameworks explicitly referenced by the DLD in its own Q1 2026 results commentary.

Source: Dubai Land Department official Q1 2026 press release; D&B Properties (Metro Blue Line detail).

11.2 Mortgage Environment & Interest Rate Outlook

Because the UAE dirham is pegged to the US dollar, the CBUAE's Base Rate mechanically tracks US Federal Reserve policy. The Base Rate was cut to 3.65% in December 2025 and has been held at that level through at least April 2026 (three consecutive holds as of the most recent data reviewed), mirroring the Fed's own pause. Market commentary (Gulf Business, IndexBox) expects further gradual easing in 2026 if the Fed delivers additional cuts, which would modestly reduce financed buyers' borrowing costs over the medium term — relevant context for a Greenspoint purchase if the client were to consider mortgage financing to bridge the budget gap identified in Part 6.

Source: Trading Economics; CBUAE Quarterly Economic Review (March 2026); Gulf Business (Dec 2025).

11.3 Economic Diversification & Implications for Residential Demand

The CBUAE's own analysis attributes 2025–2026 growth primarily to non-hydrocarbon sectors — financial and insurance services, manufacturing, and construction — alongside oil production increases tied to OPEC+ quota adjustments. This diversified growth base, combined with continued population inflows (Golden Visa reforms, corporate relocation activity cited in multiple Q1 2026 market reports) directly supports sustained residential demand, as explicitly noted in Reliant Surveyors' Q1 2026 report: “Underlying drivers include sustained net population inflow associated with Golden Visa reforms, ongoing corporate relocation activity, and continued absorption of inventory.”

One important risk flag for completeness: FocusEconomics' panel (March 2026 update) noted a sharp Q2 2026 deceleration scenario tied to a (subsequently time-limited) closure of the Strait of Hormuz affecting oil exports — illustrating that, notwithstanding strong non-oil diversification, the UAE macro outlook is not free of geopolitical tail risk. This is presented as a third-party forecast-panel scenario, not a confirmed outcome, and should be monitored rather than treated as a base case.

Source: CBUAE Quarterly Economic Review (March 2026); Reliant Surveyors Q1 2026 report; FocusEconomics (March 2026 update) — Hormuz scenario flagged as a forecast-panel risk note, not a confirmed event.

Part 12 — Risk Analysis

Risk Category	Golf Acres	Greenspoint	Rating Rationale
Market Risk	MEDIUM	MEDIUM	Both face the same Dubai-wide ~120,000-unit 2026 supply wave (Part 4.4) and the Fitch-flagged bearish-scenario downside (~15%) cited via Driven Properties; Golf Acres' lower entry price and stronger liquidity (50 recorded transactions already) provide a modest cushion. Greenspoint's smaller, more recent transaction footprint (none publicly located) adds uncertainty.
Developer Risk	LOW	LOW	Both delivered by Emaar Properties/Emaar Development — AED 155bn Group revenue backlog, AED 25.7bn FY2025 net profit before tax, ~79,000–108,000 units delivered historically (Part 7). Identical developer risk for both projects.
Construction Risk	MEDIUM	MEDIUM-LOW	Golf Acres is at an earlier construction stage (Q1 2026 foundation works, handover Dec 2028 — ~30 months out) than is typical for a fully de-risked purchase, though Emaar's track record mitigates this. Greenspoint's longer runway to handover (March 2029) gives slightly more schedule buffer, but its construction progress data was Not Publicly Available in this research, which is itself a minor information-risk factor, not a confirmed construction problem.
Supply Risk	MEDIUM-HIGH	MEDIUM	Emaar South itself has multiple concurrent active sub-projects (Greenview, Greenville, Greenway phases, Golf Edge) competing for the same buyer pool (Part 9.1), which applies to apartments (Golf Acres' segment) somewhat more than to the more differentiated, larger-format townhouse segment Greenspoint occupies.
Liquidity Risk	LOW-MEDIUM	MEDIUM-HIGH	Golf Acres has a demonstrated, active secondary off-plan resale market (50 DLD-recorded transactions already, Part 4.1). Greenspoint shows no equivalent publicly-located transaction history, and townhouses generally trade less frequently than apartments per multiple Dubai-wide sources (Part 14), implying materially lower expected liquidity.
Regulatory Risk	LOW	LOW	Both projects fall under the identical DLD/RERA escrow and Oqood framework (Part 10), which is mature, well-established, and unchanged in its core structure since 2007. No regulatory risk differential between the two projects.
Economic Risk	LOW-MEDIUM	LOW-MEDIUM	Both are exposed identically to UAE/Dubai macro conditions (Part 11) — currently supportive (5%+ GDP growth, low inflation, stable rates) but with a

Risk Category	Golf Acres	Greenspoint	Rating Rationale
			flagged geopolitical tail-risk scenario (Strait of Hormuz) noted by one forecast panel. No project-specific differentiation.
Currency Risk	LOW	LOW	AED is pegged to USD; for AED- or USD-based buyers, currency risk is minimal. For buyers funding in a third currency (e.g., GBP, EUR, INR), currency risk exists but is identical across both projects and is a function of the buyer's home currency, not the project choice.

12.1 Overall Risk Synthesis

Developer risk, regulatory risk, economic risk, and currency risk are effectively identical between the two projects, since both are Emaar-delivered, RERA-regulated, AED-denominated assets in the same master community. The risk differential that matters for THIS client is concentrated in liquidity risk and budget-fit risk: Greenspoint's higher price point, thinner observed transaction history, and townhouse format (generally less liquid than apartments per Part 14 sources) combine with its budget mismatch to make it a structurally higher-friction choice for an AED 2,000,000 end-user, independent of any inherent flaw in the project itself.

Source: Risk ratings and rationale synthesised by this report from all sources cited in Parts 1, 4, 6, 7, 9, 10, 11, and 14.

Part 13 — Exit Strategy

Because neither project has a multi-year resale track record post-handover (Golf Acres handover Dec 2028; Greenspoint handover Mar 2029), the analysis below for a Golf Acres 1-bedroom purchase (the budget-compatible scenario) is necessarily forward-looking and should be read as a framework for thinking about timing, not a guaranteed return projection.

13.1 Selling After 3 Years (i.e., circa 2029, ~1 year post-handover)

- Capital appreciation: Limited track record exists this early post-handover; by comparison, Dubai Creek Harbour's earliest delivered phases (Creek Rise, delivered 2024) showed 33–62% capital appreciation from launch to current resale within roughly 4–6 years (joinoliva.com), suggesting meaningful appreciation is possible but typically accrues over a longer window than 3 years from today's still-pre-construction starting point.
- Demand: At the 3-year mark (circa 2029), the Al Maktoum Airport expansion will be approaching but will not yet have reached its first operational milestone (2032), meaning the single largest demand catalyst for the area will still be in progress, not realised. This implies more modest appreciation than would be expected after 2032.
- Liquidity: Golf Acres' demonstrated active pre-completion resale market (50 transactions) suggests adequate liquidity for a 3-year exit, though as a still-maturing community, transaction volumes are lower than in an established, high-turnover community like JVC (18,782 transactions per DXB Analytics).
- Likely buyers at 3 years: other investors and early end-users attracted by a now-delivered (or near-delivered) product at a still-discounted basis relative to central Dubai.

13.2 Selling After 5 Years (circa 2031)

- Capital appreciation: This window sits just before the airport's 2032 first-phase target, historically the point at which anticipatory price movements tend to accelerate in infrastructure-driven Dubai communities (a pattern cited generally, not Emaar-South-specifically, by K Estates and Place Overseas in Part 1).
- Demand & likely buyers: A broader mix of end-users (families, relocating professionals) and investors positioning ahead of the 2032 airport milestone.
- Liquidity: Expected to improve relative to the 3-year mark as the wider Emaar South community matures and additional phases (Greenway, Greenville, Golf Edge) complete, increasing overall community-level transaction volume and visibility.

13.3 Selling After 7 Years (circa 2033, ~1 year after Al Maktoum Phase 1)

- Capital appreciation: This is the window multiple sources (VIBGYOR, K Estates) most directly associate with the airport's structural catalyst. K Estates explicitly forecasts (as third-party commentary, not a guarantee) 15–20% near-term price increases for Dubai South broadly, with “even steeper appreciation anticipated as the airport nears completion” — a forecast that would be most relevant in this 5–7 year window rather than the immediate term.

- Demand: Highest expected demand point among the three horizons, assuming the airport's Phase 1 (150 million passengers/year) is operational as planned by 2032 and Emirates' relocation has begun in earnest.
- Resale potential / likely buyers: A maturing, more liquid market with a broader buyer base including relocating airport/aviation-sector employees, consistent with the target-buyer analysis in Part 8.

13.4 Ideal Holding Period — Assessment

Based on the structural timeline of the area's principal demand catalyst (Al Maktoum Airport Phase 1, targeted 2032), a holding period of approximately 6–8 years from today (i.e., roughly 4–5 years post-handover) aligns most closely with the point at which the area's main fundamentals-driven catalyst is expected to be realised, rather than merely anticipated. This is this report's synthesis of the cited third-party forecasts, not an independent guarantee, and the client should treat 2032 itself as a forecast date subject to the execution risk on a AED 128 billion megaproject, not a certainty.

Source: K Estates (Feb 2026); Place Overseas (Feb 2026); VIBGYOR Real Estate (May 2026); joinoliva.com (Dubai Creek Harbour appreciation precedent, used as a cross-community analogy, not a Golf Acres-specific data point). All forward-looking statements are clearly attributed to named third-party sources and are not represented as guaranteed outcomes.

Part 14 — Competitive Benchmark

The table below compares Golf Acres and Greenspoint against three other major Emaar/Dubai master communities: Dubai Hills Estate, Dubai Creek Harbour, and The Valley. Figures are drawn from the most recent verifiable sources located in this research; where sources disagree, both figures are shown.

14.1 Price & Price per Sq.Ft

Community	Entry Price	Price/Sq.Ft (typical range)	Developer	Segment
Golf Acres (Emaar South)	AED 950,000 (1-bed apt)	~AED 1,100–1,800 (DLD transacted)	Emaar	Mid-rise apartments + townhouses
Greenspoint (Emaar South)	AED 3,360,000 (3-bed townhouse)	~AED 1,400–1,560 (derived)	Emaar	Townhouses only
Dubai Hills Estate	~AED 1.5M+ (apartments, per Takween AlDar); villas command a premium	AED 1,500–2,000 (blended); AED 25,617/sqft cited by DXB Analytics appears to be a data outlier or different metric, flagged as inconsistent with other sources	Emaar	Apartments + villas
Dubai Creek Harbour	AED 1.2M (1-bed off-plan, per Oliva); some sources cite resale entry from AED 1.6M–1.9M	AED 1,600–2,800 (range across sources); recent 2024–2025 launches AED 2,400–2,600; some premium towers AED 2,760–3,460	Emaar (JV with Dubai Holding)	Waterfront apartments, penthouses, villas
The Valley	AED 1.15M–1.8M (3-bed townhouse, varies by phase/source)	AED 1,100–1,300 typical (2024/25); some clusters above AED 1,400; Phase 2 entry ~AED 1,285/sqft per one source	Emaar	Townhouses + villas

Source: Takween AlDar (May 2026); DXB Analytics (Dubai Hills figure flagged as a likely outlier/different metric); Oliva (April 2026); Casttlo (April 2026); datadxb.com community profile; topluxuryproperty.com.

14.2 Rental Yield

Community	Typical Gross Rental Yield	Source
Golf Acres / Emaar South apartments	~4.2%–6.2% (range across sources; see Part 5.1 for full reconciliation)	Bayut; Property Finder; Chestertons MENA
Greenspoint / Emaar South townhouses	~4.1% (calculated by this report from VIBGYOR average rent/price data)	VIBGYOR Real Estate
Dubai Hills Estate (1–2 bed apartments)	6.5%–7.5%	PalmObserver (March 2026)
Dubai Creek Harbour (1-bed)	5.8%–7.2% gross; one source cites up to 7–10%	Casttio (April 2026); creek-harbour-dubai.com
The Valley	Above 6% cited generally	easternhousing.ae

Source: As individually cited per row above.

14.3 Amenities, Schools, Lifestyle & Connectivity

Community	Amenities / Lifestyle	Connectivity Highlights
Golf Acres / Emaar South	18-hole golf course, pools, padel, gyms, parks; GEMS Founders School 1.0 km	~7 min to Al Maktoum Airport; ~44 min to Downtown Dubai; E611/E311 access
Greenspoint / Emaar South	Same community amenities plus private pool access; school 2.6–2.8 km	~5 min to Al Maktoum Airport (marketed); ~20 min to Dubai Marina
Dubai Hills Estate	Dubai Hills Golf Club (18-hole), Dubai Hills Mall, extensive parks	Central location between Downtown Dubai and Dubai Marina via Al Khail Road
Dubai Creek Harbour	Marina, yacht club, Ras Al Khor Wildlife Sanctuary views, Dubai Creek Tower (under development)	Close to Downtown Dubai and DXB; future Metro Blue Line station planned
The Valley	Town Centre, Sports Village, Kids' Dale, Zen & Oasis Garden, farmers' market	Jebel Ali–Lahbab Road; ~25–30 min signal-free to Downtown/DIFC/Business Bay

Source: Compiled from community-specific sources cited in Sections 14.1–14.2 plus easternhousing.ae and datadxb.com for The Valley; Emaar official community pages for Dubai Hills Estate and Dubai Creek Harbour.

14.4 Capital Appreciation, Risk & Investment Potential

Community	Capital Appreciation Signal	Risk Profile	Target Buyer
Golf Acres / Emaar South	Community PSF +19.33% to +22.8% YoY (two sources); structural catalyst not yet realised (airport Phase 1 = 2032)	Medium (early-stage community, thinner liquidity than mature areas, but strong developer)	First-time buyers, airport/aviation professionals, budget-conscious families, golf lifestyle buyers

Community	Capital Appreciation Signal	Risk Profile	Target Buyer
Greenspoint / Emaar South	Same community-level growth signal as above; project itself too new for unit-level appreciation data	Medium (same community risk) plus added liquidity risk from townhouse format and limited transaction history	Premium/larger families, higher-income professionals — explicitly NOT this client's budget segment
Dubai Hills Estate	Among the fastest-appreciating communities in 2025–2026 (+20.3% cited by Real Estate Club Dubai)	Low-Medium (established, high end-user demand, deep liquidity)	Upgrading families, premium end-users
Dubai Creek Harbour	+17.9% YoY cited by Real Estate Club Dubai; some buildings show 25–60%+ cumulative appreciation since early launches	Low-Medium (strong waterfront demand, Emaar/Dubai Holding JV, future Metro Blue Line catalyst)	Waterfront lifestyle buyers, mid-to-premium investors
The Valley	Documented +100% cumulative appreciation on 3-bed townhouses since 2020 launch per one source; PSF roughly doubled 2020–2025	Low-Medium (proven multi-year track record, strong family demand)	Family/suburban townhouse buyers, value-oriented investors

Positioning conclusion: Golf Acres and Greenspoint both sit at an earlier stage of the appreciation curve than Dubai Hills Estate, Dubai Creek Harbour, or The Valley — all three benchmark communities already show multi-year, transaction-verified appreciation track records, whereas Emaar South's growth thesis remains primarily forward-looking and tied to the 2032 airport milestone. This is a reasonable trade-off (lower entry price, lower current liquidity, higher dependence on a single future catalyst) rather than a flaw, but it should be explicitly understood by the client as a different risk/return shape than the three benchmark communities.

Source: Real Estate Club Dubai statistics page (April 2026); datadxb.com The Valley appreciation data; synthesis by this report.

Part 15 — Maps & Coordinates

Coordinates and map links below are drawn from Propsearch.ae's embedded Google Maps data (for Golf Acres) and from publicly available place names (for other points of interest, which the client/CEO can input directly into Google Maps for live directions). Where an exact verified coordinate was not located in this research, the place name is provided instead, clearly flagged.

15.1 Verified Coordinates

Location	Coordinates / Map Reference	Source
Golf Acres	24.865147, 55.138351	Propsearch.ae (embedded Google Maps reference)
Greenspoint	Specific coordinates Not Publicly Available in this research; located within Emaar South, Dubai South, adjacent to Golf Acres per community maps	Propsearch.ae community guide (no embedded coordinate found for this specific sub-project)

15.2 Key Points of Interest (Place Names for Google Maps Lookup)

Place	Approx. Distance from Golf Acres	Notes
Al Maktoum International Airport (Dubai World Central / DWC)	~7 minutes' drive	Propsearch.ae drive-time data
Expo City Dubai	10.6 km	Propsearch.ae
Sheikh Mohammed Bin Zayed Road (E311)	Direct access from Emaar South	Multiple agent sources
Emirates Road (E611)	Direct access from Emaar South	Multiple agent sources
GEMS Founders School – Dubai South	1.0 km	Propsearch.ae nearby-schools data
Greenfield International School	12.6 km	Propsearch.ae
The International School of Choueifat – DIP	14.0 km	Propsearch.ae
Dove Green Private School	14.7 km	Propsearch.ae
Al Maktoum Airport Clinic	~8 minutes' drive	Property Finder Emaar South community guide
NMC Royal Hospital, Dubai Investments Park	Under 20 minutes' drive	Property Finder
Holiday Inn Dubai Al Maktoum Airport (nearest hotel/F&B node)	0.8 km	Propsearch.ae
Aloft Dubai South	0.9 km	Propsearch.ae

Place	Approx. Distance from Golf Acres	Notes
Emaar South Golf Club / 18-hole course	1.0 km	Propsearch.ae
Jubilee Park (Expo City area)	10.3 km	Propsearch.ae
Al Forsan Park	10.9 km	Propsearch.ae
Nearby malls (e.g., Grand Hyper Sakany / community retail)	Distances Not Publicly Available at major-mall level; Emaar South's primary retail is community-level village retail rather than a regional mall, per multiple sources	VIBGYOR Real Estate; Chestertons MENA

Note: no single official Emaar or Dubai South masterplan PDF with a comprehensive points-of-interest map was retrieved in raw form during this research session; the distances above are aggregated from Propsearch.ae's individual location-guide pages and Property Finder's community guide, both of which independently cite Google Maps-derived drive times.

Source: Propsearch.ae Golf Acres and Emaar South guides; Property Finder Emaar South community guide.

Part 16 — Final Investment Recommendation

This section synthesises Parts 1–15 into a single CEO-level recommendation, presented as a senior investment consultant would present to a brokerage CEO ahead of a client meeting.

16.1 The Mandate, Restated

The client is a residential end-user with a firm budget of AED 2,000,000, evaluating two specific Emaar South launches: Golf Acres and Greenspoint. The objective is to determine which represents the strongest long-term residential opportunity based on affordability, livability, connectivity, future appreciation, developer quality, and investment fundamentals.

16.2 Recommendation

RECOMMENDATION: GOLF ACRES

Golf Acres is recommended over Greenspoint for this specific client, on the basis of a single decisive, verifiable fact: Greenspoint's entry price (AED 3,360,000–3,532,888) exceeds the client's stated AED 2,000,000 budget by 68%–77%, with no unit type available within budget. Golf Acres' 1-bedroom (AED 950,000) and 2-bedroom (AED 1,750,888) apartments both fit comfortably within budget, leaving capital headroom for transaction costs, furnishing, and contingency.

This is not a judgment that Greenspoint is a weaker project in absolute terms — Part 14 shows it occupies a credible, larger-format premium niche within the same master community. It is a judgment that Greenspoint does not fit THIS client's stated mandate, while Golf Acres does. If the client's budget were to increase materially (see Section 16.6 below), this recommendation should be revisited.

16.3 Supporting Evidence

- **Affordability:** Golf Acres' AED 950,000 entry price is verified across five independent sources (Emaar official site, Property Finder, JnA House, Provident Estate, Propsearch.ae/DLD) and fits within budget with room to spare; Greenspoint's AED 3.36M+ entry price is verified across four independent sources (Property Finder, Everhomes, OPR.ae, Asyan Properties) and does not fit.
- **Livability:** Golf Acres offers a closer school (1.0 km vs. Greenspoint's 2.6–2.8 km) and a full range of unit sizes (1–3 bed apartments + townhouses) suited to a single end-user household, whereas Greenspoint's smallest unit (a 3-bed townhouse at ~2,418–2,434 sq.ft) may be more space than a typical single end-user buyer needs at this budget level.
- **Connectivity:** Both projects share materially similar airport and Expo City proximity (Golf Acres ~7 minutes to Al Maktoum Airport; Greenspoint ~5 minutes per marketing materials) — connectivity is not a meaningful differentiator between the two.
- **Future appreciation:** Both benefit identically from the AED 128bn Al Maktoum Airport catalyst and from the documented Emaar South community-level PSF growth (+19.33% to +22.8% YoY across two sources). Neither project has its own appreciation track record yet, so this factor is a wash between the two — it favours Emaar South as a community, not either specific project.

- Developer quality: Identical — both are Emaar Development PJSC launches, sharing the same AED 155bn Group revenue backlog and FY2025 record financial results (Part 7).
- Investment fundamentals: Golf Acres has a demonstrated active secondary/resale market (50 DLD-recorded transactions already) — a meaningfully stronger liquidity signal than Greenspoint, for which no comparable transaction history was located in this research.

16.4 Investment Score

Criterion (Weight)	Golf Acres Score	Greenspoint Score	Basis
Budget fit (30%)	30 / 30	0 / 30	Greenspoint exceeds AED 2,000,000 budget by 68%+; Golf Acres fits with headroom
Developer quality (15%)	15 / 15	15 / 15	Identical — same developer, same financial strength
Connectivity (10%)	9 / 10	10 / 10	Both strong; Greenspoint marginally closer to airport per marketing claims
Livability / amenities (10%)	9 / 10	9 / 10	Both share community amenities; Golf Acres closer to school, Greenspoint offers more space
Liquidity / transaction history (15%)	13 / 15	5 / 15	Golf Acres has 50 verified DLD transactions; Greenspoint has none located
Regulatory & developer-risk profile (10%)	10 / 10	10 / 10	Identical escrow/RERA framework, identical developer
Forward appreciation catalyst exposure (10%)	9 / 10	9 / 10	Both equally exposed to the airport/Expo catalyst as Emaar South assets
TOTAL (/100)	95 / 100	58 / 100	Weighted sum

Methodology note: this scoring framework and its weights were constructed by this report specifically to reflect the stated client mandate (an end-user with a firm AED 2,000,000 budget). It is not a universal, industry-standard scoring model, and a different client profile (e.g., a cash-rich investor with a AED 5,000,000 budget) would likely produce a different — and possibly inverted — relative ranking. This is explicitly a client-specific score, not an absolute statement that Golf Acres is a 'better project' than Greenspoint in all circumstances.

16.5 Strengths & Weaknesses Summary

Golf Acres

Strengths	Weaknesses
Fits AED 2,000,000 budget with significant headroom	Earlier construction stage (Q1 2026 start) than Greenspoint relative to today's date, implying a longer wait to handover (Dec 2028) from a cash-flow perspective
Demonstrated active resale/liquidity (50 DLD transactions)	Apartment segment faces more concurrent Emaar South competition (Golf Views, Golf Point, Vista Ridge, etc.)
Closest school proximity of the two projects (1.0 km)	Smaller unit sizes than Greenspoint, less suited to large families
Flexible 10/70/20 payment plan with only 10% upfront	Source data shows minor discrepancies (13 vs. 16 storeys) — a flag for the client to verify directly with Emaar before signing

Greenspoint

Strengths	Weaknesses
Larger living space (up to ~2,737 sq.ft BUA) and private plots	Does not fit the client's AED 2,000,000 budget under any unit type
Marketed as marginally closer to the airport (~5 min)	No project-specific DLD transaction history located — weaker demonstrated liquidity signal
More recent (2025) launch — potentially more modern specification	Further from the nearest school (2.6–2.8 km) than Golf Acres
Premium positioning may appeal to a different, higher-budget client	Construction-progress data Not Publicly Available — an information gap, not a confirmed issue, but still a gap

16.6 5-Year and 10-Year Outlook

Golf Acres — 5-Year Outlook (to ~2031)

Handover (Dec 2028) will have occurred roughly 2.5 years prior, placing the unit in the early-to-mid stage of post-handover community maturation, one year ahead of the Al Maktoum Airport's targeted 2032 Phase 1 launch. Expect continued, moderate appreciation tied to community build-out (Greenway, Greenville, Golf Edge phases completing in this window) but the principal anticipated catalyst (airport Phase 1) will not yet be fully realised.

Golf Acres — 10-Year Outlook (to ~2036)

This window comfortably spans the Al Maktoum Airport's targeted 2032 Phase 1 operational date and Emirates' planned full relocation. If executed as currently planned (a meaningful “if” given the scale of a AED 128bn megaproject), this is the horizon over which multiple sources (K Estates, VIBGYOR) suggest the area's full structural re-rating would be expected to occur, alongside broader Emaar South community maturation (schools, retail, healthcare facilities reaching the “self-contained community” status referenced by Emaar's own marketing in Part 1).

This report does not have access to a verified, audited 10-year price forecast model and explicitly does not manufacture one. The outlook above is a synthesis of named third-party directional commentary, not a quantified forecast, and should be treated accordingly.

16.7 Risk Summary

Per Part 12, Golf Acres carries LOW developer, regulatory, and currency risk; MEDIUM market, construction, and economic risk; MEDIUM-HIGH supply risk (multiple concurrent Emaar South apartment launches); and LOW-MEDIUM liquidity risk (demonstrated active resale market). No risk factor identified in this research is, on its own, a reason to avoid the project — but the combination of early construction stage and a 30-month wait to handover means the client should be comfortable with both the financial commitment schedule (Part 6) and the multi-year holding horizon discussed in Part 13 before proceeding.

16.8 Final Recommendation

Proceed with Golf Acres as the recommended project for this client. Specifically: a 1-bedroom unit (AED 950,000) maximises budget headroom and contingency; a 2-bedroom unit (AED 1,750,888) maximises the use of the full AED 2,000,000 budget while remaining within it, and may better suit a client anticipating future household growth. Greenspoint should be revisited only if the client's budget changes materially, or if a future Greenspoint phase (or a comparable apartment-format Emaar South launch) is introduced at a price point within AED 2,000,000.

Recommended next steps for the brokerage: (1) verify the current live availability and exact unit-level pricing for Golf Acres directly with Emaar Properties or via the Property Finder/Propsearch project pages, as off-plan pricing and inventory can change without notice (the official Property Finder page itself carries this exact disclaimer); (2) confirm the project's RERA registration number and escrow account details via the Dubai REST app before the client makes any payment; (3) reconcile the minor data discrepancies flagged throughout this report (storey count, exact handover date variants, yield-estimate range) directly with Emaar's sales team; (4) if the client has any flexibility on budget or is open to financing, present Greenspoint as a secondary option using the analysis in Parts 2, 6, and 8 above.

Source: Synthesis by this report from all Parts 1–15 above and their underlying cited sources.

END OF REPORT

This report was compiled using publicly available web sources as of late June 2026. It does not constitute financial, legal, or investment advice, and the preparer (Claude, an AI assistant created by Anthropic) is not a licensed real estate broker, financial advisor, or legal counsel. All factual claims are sourced as indicated; where verification was not possible, this is explicitly stated as "Not Publicly Available." Prices, availability, and regulatory details should be independently reconfirmed with Emaar Properties, the Dubai Land Department, and RERA before any transaction.
